

Our intentions are to continue to clean up our 20 acres of land from years of trash, dumping of debris and neglect from no one maintaining the property. It is our intent to remove the completely uprooted trees and any dead trees that are leaning and could potentially be a hazard to us as property owners and any others who may randomly walk or hike our property. However, there will not be any digging or disruptions to the remaining stumps or the ground around them. Additionally, as a preventative measure, it is our intent to remove any invasive vines that are wrapping around and damaging and killing the trees. Finally, we would like to be able to police the trash that blows onto our property from Rt 85 that abuts our property and the pond, as well as maintain an existing pathway around the pond.

We have an existing permit for our driveway that does not allow for cleanup and removal of downed trees. We would like to be able to do so in the event a tree naturally comes down across the driveway blocking our ability to come and go. Our driveway is a gravel driveway, we would like to have the ability to maintain the driveway by replacing stones should we need to, as over time gravel may be washed away creating pot holes.

**Our new adjacent neighbors to 8 daisy hill Dr. Are happy the property will be built on.**
