

To the Inland Wetlands Montville Ct

From Richard Dubina
51 Kitemaug Rd
Uncasville Ct

I would like to put a 8'x8' shed that is on 2 4x4 skids (see shed in pictures) The shed would be located approximately 13' North or to the right of the existing Shed . The front of the sheds will be in line with each other with a stockade fence between them to hide my lawn care equipment like my wheelbarrow, lawn seed spreader, lawn roller. The work will entail putting about two pickup truck loads of $\frac{3}{4}$ inch stone under the shed, Bring the shed in on a trailer and set it on the stone then put up a stockade fence between the fronts of the sheds, all work will be done by hand. The shed will be used for storage of items like rakes, shovels, Fishing equipment, boating accessories, stuff like that.
