

# Public Hearing and Open House

Listen to a presentation on the Facilities Plan & share your comments on the Plan with the WPCA!

## BACKGROUND

Montville's Water Pollution Control Authority (WPCA) is updating its Facilities Plan to determine the sewage collection and treatment needs of the community for the next 20 years.

The components of the Facilities Plan include:

- A review of municipal sewer rules, regulations, and ordinances
- An evaluation of the Oxoboxo Lake community's sanitary sewer needs
- Assessments of pumping stations and treatment plant infrastructure and equipment
- Water quality studies
- Financial impacts

The Facilities Plan makes recommendations on infrastructure enhancements to meet the short- and long-term needs of the Montville community.

## MEETING DETAILS

Open House followed by a Public Hearing on the WPCA's Facilities Plan

|               |  |
